

Math2064 Author's Declaration.

This declaration lists the responsibilities and work of each member in the group for the Math2064 Numerical Methods group report. The authors declare that they are the sole authors of the report as a whole and that within the group, a fair attempt was made by all members to contribute equally to the report.

James Anderson:

- Added test problem for a DE to benchmark.
- Made plots for benchmark DEs.
- Graph for error vs function evaluations.

James Gregory:

- Had idea to do DE related paper after it was agreed betting related papers would be too light on maths.
- Made specific and general flowcharts for RK2 and RK4 methods.
- Wrote author's declaration.

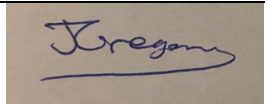

Riley Marriott:

- Wrote and submitted abstract.
- Wrote sections: introduction, theory, numerical methods, examples and applications
- Wrote code for SIR model, comparison, convergence and timing plots
- Did skeleton latex format of document.
- Finished first draft of project, 4500 words.
- Trimmed draft to required 2500-word count after Andre cut to 4000.
- Formatted code and edited references to be in correct sequence.

Andre Ristovsky:

- Edited word count from 4500 to under 4000.
- Finalised report – Ensured no errors in mathematical processes or in report
